A quick tip on septic tank maintenance:

In Paradise we all have individual septic tanks/systems. There have been mixed reports about the amount of time you should go between pumping your septic tank.

According to the Bear River Health Department "Most septic tanks need pumped every 3 to 5 years. An annual inspection should be performed to see how much sludge has accumulated at the bottom of the tank. If the sludge has built up to 12 inches from the bottom of the outlet device then the tank needs cleaned/pumped." Please have a professional do this as the gasses found in septic tanks can be dangerous. If you would like additional information concerning septic tanks and systems please call the Office.

Have a happy and safe Halloween and watch for those little trick-or-treaters!
